FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARYMs. Marlene H. Dortch
Secretary
Federal Communications Commission
445 12th Street, SW
Washington, DC 20554Re: Docket 04-68, Ex Parte Submission

Dear Ms. Dortch:

On behalf of our client, Victor Company of Japan, Ltd. ("JVC"), enclosed for filing in Docket 04-68 – "Certification for Digital Recording Methods to be Used in Covered Demodulator Products, D-VHS" – are five copies of International Standard IEC 60774-5, "Helical-scan video tape cassette system using 12,65 mm (0,5 in) magnetic tape on type VHS, part 5: D-VHS" issued by the International Electrotechnical Commission ("IEC"). As discussed with Susan Mort of the Media Bureau staff, the copies are contained on CD recordable media for use by the Commission in conjunction with its review of D-VHS technology in the above-captioned docket. The standard constitutes the technical information related to D-VHS technology other than the scrambling and related security system. Accordingly, this information is submitted as partially responsive to questions raised by the FCC staff during a meeting between the Media Bureau and JVC held on April 8, 2004.

While the document is not confidential, it is subject to copyright held by, and a specific license for use issued by, the IEC. As counsel for JVC, we have purchased these five copies from the IEC and obtained the IEC's specific permission to submit these five copies in this form, subject to the understanding that the FCC will make no copies in any form of the submission from these CD recordable copies. The IEC's letter granting permission for this use is attached to this letter and is included on each of the CD copies of the standard document. If the FCC wishes to have additional copies, or if others wish to have their own copy, the IEC sells the document through its on-line "webstore" at http://www.iec.ch/online_news/justpub/jp_2004/jp.htm#60774-5.

Ref: JJB/Weil, Gotshal & Manges/JVC

Dear Mr. Turnbull,

Subject: Use of IEC 60774-5 for submission to US Federal Communications Commission for your client, Victor Company of Japan, Ltd., "JVC"

Reference is made to your email of 2004-04-19 following your purchase of the five (5) copies of the electronic version of the IEC International Standard 60775-5 on 2004-04-16 (Webstore Order No. WS2004-002404), and your request to be able to submit this standard to the US Federal Communications Commission in support of the application made by your client (Victor Company of Japan, Ltd. or "JVC") with regard to D-VHS technology.

Since the electronic versions purchased from the IEC Webstore contain a personalized watermark that might cause confusion during the US FCC submission, under separate cover I am sending you a non-watermarked copy of the electronic version of IEC 60774-5 for the sole and exclusive purpose of the submission process.

I confirm that the IEC hereby grants to you permission to use the above files for the purposes of your client's submission to the US FCC. This includes the right to transmit the electronic files and/or the one paper copy permitted of each electronic file. The electronic files may be stored on CD recorded electronic form for the purposes of the submission to the US FCC.

We understand that the electronic and/or paper copies of the IEC 60774-5 will be submitted to the US FCC in MB Docket No. 04-68.

The permission above does not include the right of the US FCC to make further copies of the IEC 60774-5 International Standard for internal use or to make copies available to external third parties.

Yours sincerely,

Jonathan Buck
Head of Communications & Marketing

cc: A. Amit, IEC General Secretary
